

PROJECT CASE STUDY GOLF COURSE DRAINAGE

Project	Application	Product	Location	Year
Jaycee Municipal Golf Course	Natural Grass Putting Green Drainage	Hydraway 2000	Cape Girardeau, MO	2010

Problem
Total Re-Construction of all 18 putting greens due to poor drainage.

Solution
Utilize Hydraway 2000 and proper reconstruction.

Result
The Greens are draining perfect and the turf is better due to the drainage and maintenance.

“ Maumee Bay Turf Center is a quality builder of Synthetic and Natural Turf Fields and we use the Hydraway 2000 drainage system because of the quality that our customers demand. It's easier to do the job right the first time, rather than taking short cuts with lower quality systems. We like the compressive strengths and the ease of installations. This is by far the best system on the market; we have been very pleased with the performance and quality of the Hydraway systems we use. ”
